- > A secure, encrypted connection between your network and RightFax Private Cloud, enabling integration with your business applications, including desktop and MFPs

Product overview

RightFax Private Cloud, from Y2K Telecom, takes care of deployment and operational complexities associated with your RightFax telephony, hardware and software, enabling your IT resources to refocus its efforts on your organisation's strategic projects.

Features

RightFax Private Cloud allows businesses to outsource the day-to-day management of their RightFax servers. Y2K Telecom offers the following:

- Dual data centres
- Enterprise-IP network which brings significant Telco cost savings to your fax traffic
- World class infrastructure layer built on Cisco, VMware and EMC infrastructure
- Optional disaster recovery including geo-redundancy, backups and data archiving
- Full RightFax functionality including production, desktop and MFP faxing
- 24x7x365 Service level agreement supported by certified RightFax engineers
- Optional managed services

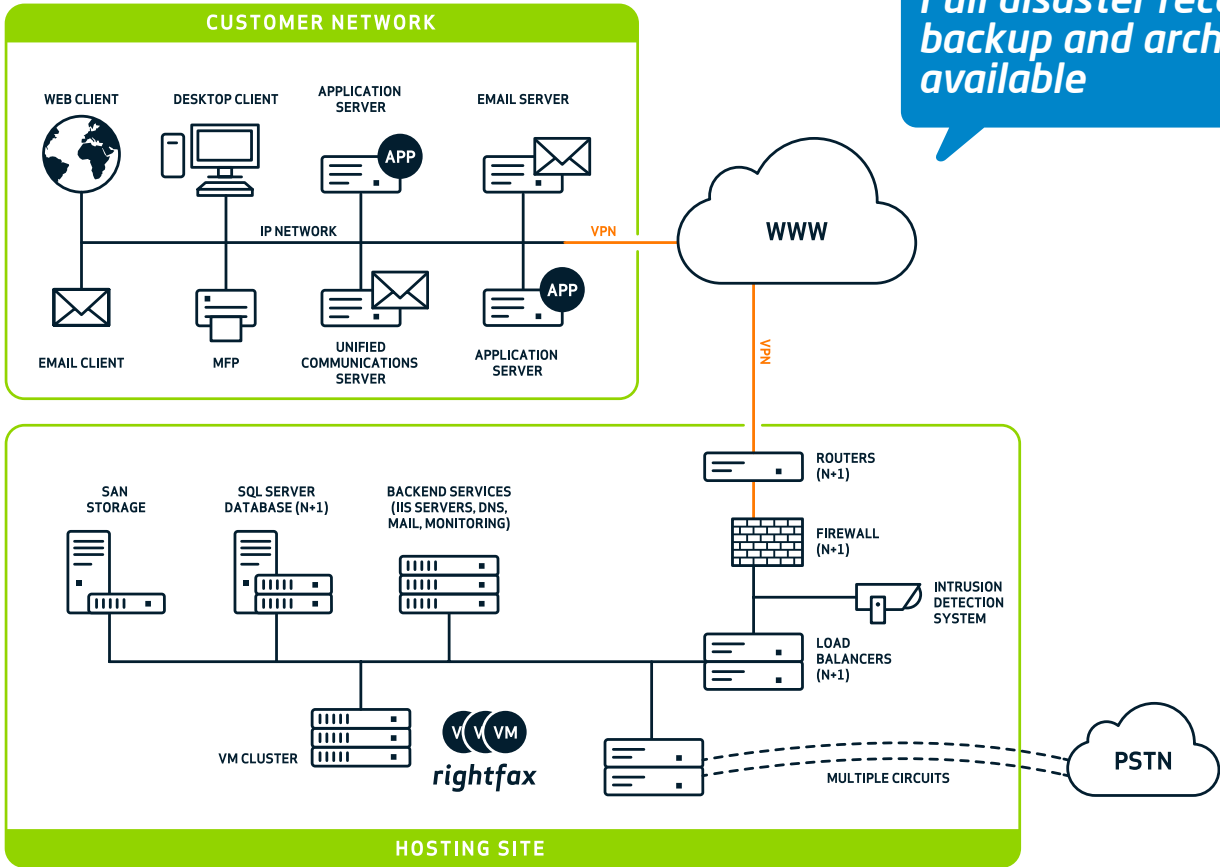

RightFax Private Cloud is a best practice implementation in line with OpenText standards allowing customers to experience the full functionality of RightFax at significantly reduced costs.

**Simplified transition
to Voice over IP**
